LIGHTING SECTOR

Through our industry-led and not-for-profit approach B2B Compliance provides Producers with a professional, hassle-free solution to meeting their obligations. As well as delivering full compliance with the UK WEEE Regulations we provide expert advice and support on all WEEE issues ensuring that our Members receive an exceptional service.

WEEE CHALLENGES

There are two aspects to the lighting sector:

- fluorescent lamps
- luminaires

Complex obligations - Each sub-sector has its own rules under the WEEE legislation with differences as to what is obligated and how the solutions are attained.

Hazardous Nature - Fluorescent Lamps and Gas Discharge Lamps contain materials which are classed as hazardous. This can have storage implications when these items reach their end-of-life.

B2B COMPLIANCE SOLUTIONS

Through its work in co-ordination with both Recolight and Lumicom - the two Lighting Industry focused schemes - B2B Compliance understands the needs of Producers from the lighting industry. B2B Compliance can attain compliance for Producers in both the fluorescent lamp and luminaire markets, without the need for a "per item" charge up front.

B2B Compliance ensures best value through recycling efficiencies, allowing lighting sector producers to minimise the impact of WEEE on their businesses. This has been recognised by the Professional Lighting and Sound Association (PLASA) who are active supporters of B2B Compliance.

PLASA has over 500 members worldwide, including the leading specialists in professional audio, lighting, staging, rigging, AV, communications and related disciplines. In addition to providing members with expert advice on a wide range of business and technical issues, PLASA also monitors legislative developments, alerting members to forthcoming UK, EU and international laws and regulations that may affect the way they manage their business.
